

All excited to use CSAF

Request and Promote

Option 1: Vendor provides CSAF

- Asset owner able to directly use it
- But:
 - Generation on best effort
 - No contractual obligation
 - No data quality rules

Option 2: Customers requests CSAF

- Business case for CSAF support
- Unless money involved: best effort / no guarantees
- But:
 - What data should be a part?
 - How to sync between different sources?

Option 3: CSAF in the contract

- Known and agreed on rules
- But:
 - Hard to get it right
 - Missing content / standard updates?
 - Contract people usually not CSAF experts
 - CSAF experts not contract experts

What should go into the contract?

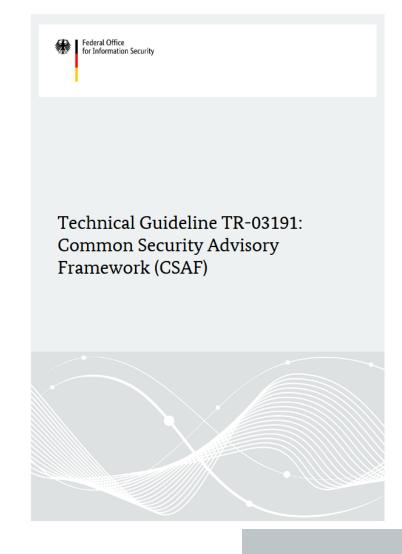

Push CSAF into contracts

BSI TR-03191

- https://www.bsi.bund.de/dok/1111264
- One sentence in contract:
 "The supplier MUST conform BSI TR-03191."
- Feel free to adopt / copy / use it

BSI TR-03191 content

- Minimum CSAF version
- Scope of application
- CVD specifics (as best practices)
- TLP labels
- Product_tree
- Usage of profiles
- Distribution

Benefits

- Easy to use for users => no overhead
- Scalable
- One set of requirements for vendors

Thank you for your attention!
